

CAMBRIAN CAVING COUNCIL

REPORTS FOR THE 2021 ONLINE AGM

OFFICER'S REPORTS

A) CHAIRMAN

Verbal update
Martyn Farr

B) SECRETARY

A very quiet year due to the Pandemic, other than chasing up email addresses for some of the Cambrian Clubs, little else has happened.

I am willing to stand again for the next year.
R Allan Richardson

C) TREASURER

Treasurer's Report for the Year ending 31/12/20

The audited end of year accounts can be seen to show a decrease in funds of £687.98 with the current funds available standing at £5,524.69. I am pretty sure that we will be able to recover all the 2020 expenditure of £1,097.67 from BCA once that year's grant has been applied for, in the light of their current policies.

It can be seen that the CCC donation to South and Mid Wales Cave Rescue Team constituted almost half of 2020 expenses. The question was raised at the time about the other Welsh rescue teams as well as whether discussions should take place with BCA regarding some form of ongoing support from them for all Rescue teams, as I believe happened in the past. This would inevitably get confused with them being charitable institutions, that I know little about. Obviously CCC funds would not be sufficient to cover that outlay permanently but if we were assured of re-imburement from BCA, it would not be a problem.

Obviously, activities last year were severely limited by Covid restrictions and continue to be so at present. All being well there will be a flurry of caving activity sooner rather than later and new projects to support financially.

I again need to thank Ian Adams very much for kindly completing the audit very promptly. I would be willing to carry on in the job but again would not mind at all if someone else is keen to take over.

Mary Rogers

Honorary Scrutineer's Report

I have examined the above Income & Expenditure Account for the year ended 31st December 2020 and the balance sheet as at that date. In my opinion they are in accordance with the council's accounting records and explanations provided.

(Signed) Ian L Adams FFA FFTA AIAB (For Abacus Accountants) Date: 05-Mar 2021

D) CONSERVATION AND ACCESS OFFICER

CORONAVIRUS PANDEMIC

It has been a quiet year for caving because of the Coronavirus pandemic; the first lockdown beginning in late March just after our 2020 AGM and a third one now underway in Wales since late December 2020 that may be relaxed somewhat for outdoors recreation after the review in mid-March 2021. So, hopefully, some good news by the time of this year's Cambrian AGM.

I have attended a number of meetings both real and virtual over the past year to pursue caving interests as the epidemic and the responses to it have unfolded. I have signed Cambrian up as a member of the Welsh Sports Association (WSA) which is a professionally-run representative body for all sports. WSA have been responsive, helpful and have run a useful series of video meetings at which public health and government officials have presented their views.

There has been massive negative impact on outdoors education and professionals working in that sector who have been largely out of work now for almost a year. I have attended some meetings of the Outdoors Alliance Wales and monitor their forum. OAW is an ad hoc group that brings together mainly outdoors providers, lobbying on their behalf; Gethin Thomas been closely involved with this group to represent professional cave leaders rather than myself, and I am very grateful for his engagement with this.

There have been no Cambrian newsletters in the past year for the reason that recreational caving activities have, for the most part, been on hold and there was little else but general political and medical news mainly national in scope. I am happy to continue in the role of news editor when more normal times return and there is sufficient interesting material to publish.

John Sheehy has taken over the role of Cambrian webmaster from me and the handover has gone smoothly. I would like to thank him for investing the time to learn the productions tools so as to maintain the current website and to extend it. He and I have produced a regular Covid info page which is unfortunately more about the negative impact of the pandemic on caving and cancelled events than good news stories. We gave up trying to echo the official restrictions on sport and travel because they changed so often; they were inconsistent across all the Home Nations leading to widespread public confusion; and the sheer volume and length of the complex interpretations put on them by the gov.wales website is not easy to summarise.

'CROW CAVING' JUDICIAL REVIEW

This started on 9th April 2020 with a pre-action formal letter from specialist solicitors to the Welsh Government as potential defendant. David Rose as BCA CROW Liaison Officer is the complainant, not myself, and legal costs are underwritten by BCA. I am, however, involved as I had applied to join the WG's Access Reform Advisory Group (ARAG) working group on land access reform and I was turned down on the specific grounds that the government held that the CROW Act did not apply to caving. The very purpose of these reforms is to widen the scope of the CROW Act to allow a wider range of activities where these are currently

excluded and create other public goods. According to their minutes, the decision was made by ARAG on 22nd January 2020 and then kept secret until 24th February when I was told in a letter from WG. There is only a 3 month period to launch Judicial Review proceedings after an impugned government decision – and a month of it was lost either due the government's inefficiency in sharing their decision with me reasonably quickly, or in the alternative due to withholding it.

We claim that a government decision (to exclude caving from the reform programme) was made on the basis of an incorrect interpretation of statute (that the CROW act does not apply to caving in their view). It was also illogical in that if caving was excluded then at least it should have been considered by the ARAG expert groups whether it was practical to bring it within the scope of CROW. NRW and Defra soon joined the JR case as Interested Parties.

NRW in its written response to the 2017 Public Consultation on land access reform said that a court case would be the best way to settle the 'CROW Caving' question. Also, about that time, at a private meeting between CCC and BCA and NRW, their internal solicitor went so far as to suggest various ways for landing NRW in court so as to decide the CROW question. So, when the opportunity arose through the legislative reform programme, it was rather a surprise to find NRW and WG trying very hard to stop the case on procedural grounds by offering the defence that no 'justiciable' decision had been made. Justiciable means that class of decisions which are amenable to a judicial review. It was an unusual and highly technical legal argument designed to prevent the substantive CROW question from ever being considered by the court. Essentially, they were saying their decision to exclude caving, as set out in WG's letter to me, was not actually a decision, or at least was not the kind of decision that a court could review.

The first step in Judicial Review proceedings is to 'apply for permission' for a full hearing. This filtering process is generally done as a paper exercise, not at a court hearing, and permission was refused on that basis by the first judge on 19th August. We then applied for a court hearing which took place by video link in the autumn in front a different judge. It was very disappointing after over an hour of debate that this Judge too refused to let our case go to trial. He did so by reading out a prepared statement from what appeared to be a computer screen out of view of the camera to his left. So what had been said in court that day could not have had any bearing on the outcome. Our legal team considered this to be very unfair and they offered to take the permission case to the Appeal Court at their own expense. This was dealt with as another paper exercise in February by Lord Justice Edis whose speciality apparently is criminal cases.

We were very fortunate in this regard as it is clear from his judgment that he had read all the accompanying papers critically and had come to tentative conclusions as to the potential inaccuracy or unreliability of some of the statements made therein, and to the extent of the Minister's own involvement, or an impermissible delegation to her officials, who in turn delegated it to a steering group. LJ Edis said "it is arguable that the exclusion of caving from the reform process either did involve justiciable decisions of the Welsh Government [Ministers] or that it ought to have done." So permission was granted for our case to proceed at a full hearing back in the Administrative Court. LJ Edis also suggested re-working our case so as to turn the spotlight on the Minister's and her civil servant's actions and inactions, and doing some discovery work to find out who knew what when, etc.

So in summary, it has taken 10 months and an eye-watering sum of national caving money to reach the stage that we should have been at from the very outset had NRW and WG been genuinely willing to embrace an amicable legal resolution of the "CROW Caving" question instead of having to be dragged into court. Each side will now prepare their respective papers on this new basis and the case is likely to be heard later this year. Given that we are now in quite a strong position, the government may try to resolve this with an out-of-court settlement that is acceptable to cavers rather than to air everything in open court.

NATIONAL ACCESS FORUM FOR WALES

NRW has convened a couple of NAFW meetings via Microsoft Teams in the past year. I have stopped attending NRW meetings although I do read their email and documents which are circulated to a mailing list of over 100 people involved in outdoors recreation. There seems little point engaging with NRW now that NRW has pulled out of convening cave management committees and has been assisting the government to obstruct the Judicial Review. Much of the subject matter of NAFW meetings currently is the reform programme from which the government and NRW have excluded caving as a matter of principle which reflects their own interpretation of the CROW Act. The national forum does not develop policy nor votes on anything other than its membership applications. It is not a forum in the sense of having any debate, and in my experience, it is more of a symposium where delegates' papers are read or as a platform on which NRW can promote its own work and its own policies.

External bodies can also present general reviews of their own areas of interest at NAFW. Some who have addressed the meeting include the YHA, National Trust, Canal and River Trust, angling bodies, paddling bodies, and so forth. I gave a talk on caving a couple of years ago and this was the meeting at which NRW stated in public that they had no issues with caving from a conservation viewpoint and conservation is not the reason for their position on the CROW Act.

NRW MINES ACCESS SCHEME

This is still operating although mine visits have, of course, been reduced in 2020. There are some new NRW staff involved who are helpful and engaged with the historic environment. I took them on a visit around Bryneglwys over the summer and they are keen to see more disused mines. A risk assessment is outstanding for Hendre Ddu mine, and I have now got written permission to drive in the forest to take gear to site when Covid regulations allow me to do it. I welcome interest from anyone interested in exploring this mine and writing a report.

It will help if a few more people would register their interest in visiting the mines (via the caveaccess.co.uk website) even if being able to visit the mines is limited at the present time. This helps demonstrate to NRW that the scheme is attracting interest. Registration and access to the mines on Welsh Government and NRW land is free and you only need to give your name, email address, club name if you are in one, and your BCA number for insurance purposes.

BRITISH CAVING ASSOCIATION

Allan Richardson and I have shared the pleasure of attending BCA meetings on behalf of Cambrian, and Allan has now become BCA Secretary in addition to his role as Cambrian secretary. This follows a lot of resignations and appointments at BCA from 2018 to the present. BCA is now on its fourth chairman and fourth secretary in that period. The treasurer role has been stable since Howard Jones took over, but it means the other two of the three BCA Executive team have practically no experience in BCA matters while Howard has just 2-3 years. Let's hope this proves advantageous as it sets the scene for a fresh start with all new ideas.

One area with massive improvement is IT, with a new modern BCA website, electronic voting, and investment in Zoom for holding virtual national meetings saving £thousands per year on travel expenses. David Rose has also done a great job on producing attractive newsletters.

As Allan has to attend all BCA meetings in his new role, we can no longer share the job of representing Cambrian. This has been made easier since the advent of Zoom. John Sheehy has agreed to help with our representation and I am inducting him into the ways of the BCA.

MLCMAC

The committee, in its original form, has been in limbo since NRW withdrew from its direct involvement with caving for all practical purposes which has yet to be confirmed in writing. The MLCMAC website no longer exists but its content is available in the 'Cave Info' section of the chelseaspelaeo.org website. The permit system is in abeyance and the group is relying on visitors' common sense, goodwill and responsibility which of course is what the previous permit based system also had to rely on when intent (permit) turned into action (visit).

The way forward is for NRW to confirm it has no interest in managing the caves on the Craig-y-Cilau national nature reserve nor anywhere else and wishes for cavers to take the responsibility. The cavers on the old MLCMAC would then contact the landowner to set up new arrangements and assume NRW's former cave access management role. Assuming this all goes well, then new people from the caving community would be invited to join the new group to run it.

OFDCAC

As with MLCMAC, NRW has pulled out. A new committee has been formed which is largely composed of SWCC members, and that club also administers the keys and a permit system. This is backed up with a written agreement between NRW as the landowner of the Top Entrance and tenant at Cwm Dwr. SWCC itself owns the land with the other lower entrance.

DYOCAC

The show cave has had a disastrous financial year due to Covid, but access for cavers has been maintained but with a limit of one group per day to keep people apart. As a leader myself, I only took one group into the cave during 2020. We are very grateful to the show

cave owner for allowing some recreational access particularly set against the grim situation for touristic visits.

PDCMG

The group has not met, not even by video, since November 2018 (the latest minutes on their website) when it was decided to make a review of access and entrance policies. A report was to be prepared, made available to cavers and interested parties, then have an EGM to debate it. It was envisaged all this would take only a few months, but nothing has emerged. The group is now saying that this subject matter is too sensitive to discuss by video and the EGM will have to wait until the pandemic is over and then take place face-to-face. Very recently the group has been canvassing opinion on a physical committee meeting in the summer, if practical, at which the idea of the long-delayed EGM could be discussed.

I am sorry to have to report that another padlock has been removed from the gate in the summer of 2020. The hasp on the gate was also cut off so that a new lock cannot be fitted. The damaged gate is the group's spare gate that was fitted in 2010 when the original gate was stolen along with the gate on Drws Cefn at that time. The group considers it is impractical to repair the damaged gate during the pandemic, and it is stock proof if left in the closed position.

A465 DUALLING OF THE CLYDACH GORGE

These geotechnically-troubled road works have also been set back further by Coronavirus. The project is over 2 years late and £100m over budget. On a positive note, the new suspension bridge has come into use at the new Brynmawr junction. It is not possible yet to leave the A465 at Brynmawr after coming up the Clydach Gorge which should be borne in mind for caving trips. The central part of the gorge remains a building site with Ogof Capel still closed.

The Welsh Government website has not been updated with any progress for the Clydach Gorge section since February 2020. The Costain website has no news either since November 2019. A legal dispute between these parties went to arbitration and was settled after appeals in the WG's favour at a cost of £45m to Costain which has severely impacted its finances and work capacity. Costain have slowed down in response. A year ago the WG was saying mid-2021 for completion while Costain said end-2021, but that was before Covid struck and the massive legal bill. I feel it will now complete in 2022 at the earliest.

OGOF GOFAN AND CASTLEMARTIN RANGE WEST

Cambrian's access scheme has been used lightly in 2020 with a few summer visits, but otherwise there has been little caving activity here. The AGM for firing range recreational users did not take place due to Covid and given the lack of activity it was not felt useful to convene one by video.

BAT COUNTERS

At a personal level, I managed to retrieve my Lesser Horseshoe bat counters from the Llangattock caves and Ogof Draenen after last Spring's lockdown and an article on this research was published in the BCRA CREGJ issue 111 in September. See:

https://www.linetop.co.uk/creg/creg_j111.pdf

Five loggers were run simultaneously in five different cave entrances (Aggy, Ogof Cnw, OCAF, Draenen – Nunnery, Draenen – Drws Cefn) to compare winter bat activity levels expressed as flights per hour past the sensor. One interesting finding is that the OCAF gate prevents most bat access, as evidenced by the very low bat activity there, compared to similar nearby large cave systems. Another discovery is the synchronisation of the rises and falls in bat flight activity across these caves. It is likely weather related and thus the availability of flying insects for the bats to feed on. The question remains: how do the bats get to know?

The data loggers have been in place again for the current winter, but with bigger batteries which should last beyond the coming Spring when I expect to be able to retrieve data again. I intend to develop some circuits tuned to other bat species observed in my local caves for next winter.

GOING FORWARD

I am willing to stand in the same role again. If there is anyone willing and able to do this job or to look after a specific aspect of it as Gethin and John have been doing, then I would be happy to discuss this with you and thus create more of a team approach.

In normal times it does require going to some mid-week meetings across Wales, and now to online meetings during the day, so it best suits someone whose job or lifestyle is flexible and takes them around Wales. There is also responding to email, and being aware of developments in the caving and political events in the wider world, and maintaining useful contacts.

Stuart France

E) TRAINING OFFICER

Obviously the last 12 months has not been great. CCC have run no training events. I am in the process of organising a few events for 2021 in the hope that things will open up.

Events planned are:

- Geology walk above Llangattock
- Geology walk above OFD
- Bat evening talk/walk in the summer
- Bat tour/search in the autumn
- Cave photography workshop
- Allan is planning a cave surveying weekend at SWCC

As far as Training at BCA level is concerned Training Committee is being discussed at Exec and Council level. Training Committee represents all recreational caving and currently for the first time in over 20 years we have regional training officer in all regions and all regions are planning events. This means that the role of Training Officer may be changed to an administrator role rather than an instructor role. Training Committee has had several on-line meetings over the last 12 months, sometimes heated, but no real progress has been made

while regionally things are moving so my personal feelings are that CCC and other regions are in a good place for training but I am not sure where TC will be in the future.

I am happy to stand again unless someone else wants the position.

Rich Hill

F) EQUIPMENT AND TECHNIQUES OFFICER

Due to obvious reasons regarding the Covid pandemic, a quiet year. The main points, equipment-wise is again dominated with bolting. There is now a new resin approved and as we have no stocks of the Fisher cartridges we will continue with the latest type. We still have a stock of the "BP" type hangars.

I still intend to run a bolting course at Penwyllt when conditions allow and may have to run 2 courses.

A bolting project is being considered in the Forest of Dean and the Cambrian Caving Council will assist with supplies or practical help if requested to do so.

There has been concerns regarding the covid virus transmitted on sports equipment but existing precautions with all other equipment and surfaces need to be adhered to where practical.

Vince Allkins

G) LEGAL & INSURANCE OFFICER

My position has been mooted before and I feel that there is a consensus on the "Insurance" aspect being superfluous as any inquiries on this would simply be referred to BCA. It has been suggested that mine exploration should form part of my remit, to this I readily agree and feel that it would be a feather in the cap of CCC to be the first regional council to implement this.

My issue is with the new term as suggested "Legal and Mines Officer" as it has implications of some kind of remit over all mines, including those at work. My solution is move the word "legal" to the end and define the position as "Mine Exploration and Legal Officer". This not too much of a mouthful and is correct in that working mines do allow visitors.

I also feel that mine exploration as an activity in its own right has grown tremendously in the past few decades. As such the implications of this should be taken on board by all caving bodies. The "Legal" also sits well with this as the legal implications of abandoned mines are far more complex than those of caves, and I do pride myself with having a good understanding.

Roy Fellows

H) CAVE REGISTRAR

The Cambrian Cave Register has continued to change and grow despite this year's problems with access to the countryside. This is thanks to:

- when Covid-19 restrictions were applied at Local Authority level, an option to search (or list all) at that level was introduced. This, or the plain map showing LA boundaries, showed every LA in Wales to have at least one site listed
- the re-hosting of the Caves of North Wales website on the Cambrian Caving Council webspace: this encouraged cross checking of entries, adding a number to the Register and updating others
- work for a forthcoming special seventy fifth anniversary edition of the South Wales Caving Club Newsletter has brought attention to a lot of site entries from the Llwrch in the west to Pant Mawr in the east
- work on site location checking for cave rescue use has begun with the updating of the Catalogue of Speleological Sites for the OFD and Pant Mawr area first prepared for the CCW in 1999
- unsolicited, but very welcome, contributions from the I'r de o Ddraenen project, among others
- attempting to attribute references to as many sites as possible

Prompted and greatly assisted by the above, photos of entrances and, in some cases, passages, have begun to be introduced. This has been supported by the many photographers involved, but of special note is that the two previous Registrars have been the most prolific contributors.

It is also now possible to obtain a Google Plus Code or a what3words id for a site, an option which introduces yet more choice of mapping and satellite imagery.

I am aware of many imperfections in the present data and its presentation and have ideas for improvements but will not detail these now as experience has shown that unplanned events tend to determine progress rather than notional plans. I thank all my correspondents for their help and look forward to continuing as Cave Registrar should that be agreed.

Martin Laverty

I) WEBMASTER

I volunteered to help with the webmaster role at last year's AGM and after an intensive zoom handover in early July, I assumed responsibility for updating the website. Whilst the pandemic has meant our caving activities were curtailed throughout year, the website has

required regular updating trying to keep up to date with the Welsh Government's ever-changing, tightening and relaxing of restrictions! That said it has accelerated my progress along the learning curve.

I'm happy to continue in the role going forward.

John Sheehy

J) NEWSLETTER EDITOR

Unfortunately, with the pandemic and the first lockdown starting a week after the last AGM and low levels of activity thereafter there have been no newsletters produced this year.

Stuart France

REPORTS FROM OTHER GROUPS

A) FODCCAG

Our unique access agreement with Forestry England was renewed, only to temporarily cease due to Covid 19 on March 27th. This was renewed again on the 1st Sept, subject to all participants following the Government guidelines in force at the time of caving.

At Xmas the farmer of the land on which Wetsink is found, reported to Paul Taylor, our Chairman, the sewage outflow was running, into Dry Sink, & the master cave, & may have been running for some time. He reported this to Welsh Water, who seemed to be unaware of it! Welsh Water then sprung into action, as did we – on our part, mainly due to Craig Cameron, a daily watch on the sewage outfall, & a record of daily rainfall was instigated, together with videos of the outfall flowing into Dry Sink.

At a site meeting on the 9th of March, with a senior WW person, responsible for mid Wales, an interchange of information took place – it seems they had been very busy behind the scenes, & were well aware they had been watched by us! We learnt that in view of the shortcomings found by WW at the Joyford site, they have redesigned the whole protocol for how they operate their sewage in mid Wales. Hopefully this will be a permanent improvement. On their part, they appreciate Wetsink is the 10th longest cave in the country, with blind fish, & ancient bones in it, but did not know the outfall of the cave is in the River Wye!

John Hine, Hon. Sec. FoDCCAG.

B) WELSH MINES SOCIETY

Unsurprisingly, due to the pandemic, there is little to report from the last year. 40th Anniversary celebrations had to be put on hold and no Field Meets were held. Weekend Field Meets in 2021 are unlikely to happen although it is hoped to have a couple of one day

Meets with one of the days aimed at belatedly acknowledging 40 years of WMS. These plans are still in their infancy – who knows what the year will bring!

Next weekend, 28th March, the Spring Indoor Meet will be held virtually. A broad selection of interesting talks and presentations have been confirmed with everyone looking forward to another “mini NAMHO”.

Despite the lack of outdoor activity, or maybe because of, there has been no lack of articles for the Newsletter, the Editor has reported that he has almost enough articles for the Autumn Newsletter already!

Neil Culross Chairman

C) NWCRO

No report received

D) SMWCRT

2020 saw SMWCRT involved in 10 Rescue incidents, an increase on last year despite lockdowns. There was a higher proportion of Rescues involving working with other agencies.

Date	Location	Details
11/1/20	Ogof Ffynnon Ddu	Overdue Cwm Dwr to OFD1 WSG 2 females, 3 males had a slower trip than they expected due to increased water levels. 10 members deployed, duration 30 minutes.
28/1/20	Cystanog Mines	Assist Police in Missing person search A Warden was called by Brecon & Western Beacons MR Teams to assist with a search for a 55 year old man that had been reported missing in the Carmarthen area. SMWCRT searched 11 adits and shafts at Cystanog on the outskirts of Carmarthen that had been identified as possible locations. Nothing was found. 9 members deployed, 4 on standby, duration 5.5 hours.
8/2/20	Daren Cilau	Lost/Overdue on through trip Daren Cilau to Ogof Cnwc A party of Kent & Birmingham University students (3 males and 2 females) was on a through trip from Daren Cilau to Ogof Cnwc. They were overdue by the time they reached Antler Passage and decided to stop and wait as they had a slow-moving Diabetic in the party. SMWCRT sent in teams who searched from both directions and escorted the party out slowly via Ogof Cnwc. This rescue took place during Storm Ciara and conditions on the surface were appalling. 20 members deployed, 10 on standby, duration 6.5 hours.
22/3/20	Tre'r Ddol area Ceredigion	Assist Police in Historic missing person search SMWCRT assisted the police in a mines search which was conducted around the village of Tre'r Ddol, concentrating on a 1 km radius of the male person's home. 3 main mines

Date	Location	Details
		and 22 features were identified to search. 13 members deployed, 4 on standby duration 11.5 hours.
29/5/20	Bwlch y Clawdd (above Ton Pentre)	<p>Three sheep stuck SMWCRT were called by the RSPCA to extract a sheep from a rift (Fire & Rescue had not able to help). After trying for 7.5 hours the team members were not able to extract sheep as rift too tight and too deep (9m below surface). A second sheep was found by the farmer in a different rift – it was successfully rescued. A third sheep was found in lake and it too was successfully rescued. Small team of 5 deployed for 10 hrs 6 mins.</p>
5/7/20	Clwydyfagwr Merthyr Tydfil	<p>Assist Fire Service and CBMRT - Dog fallen down mineshaft A black Spaniel, Louis, had fallen into a mineshaft near Merthyr Tydfil. The Fire & Rescue Service had called Central Beacons MRT who transferred the incident to us at 20:28. The dog was successfully rescued from an 8 metres shaft. 5 team members attended with 1 team member providing remote coordination, duration 3 hours.</p>
27/7/20	Blackrock, Clydach	<p>Assist Police as cars left overnight near cave A member of the public reported that cavers' cars were still parked in the same place the following morning near Craig y Ffynnon. The Police were contacted to trace the owners. Our enquiries established they were cave divers who had dived into Daren Cilau from Pwll y Cwm and planned to remain in the cave until 29/07/20. Police stood down. 2 members involved, duration 1.5 hours.</p>
29/7/20	Varteg, Blaenavon	<p>Animal Rescue A dog fell into narrow rift on Mynydd Varteg Fawr, West of Blaenavon and Varteg. Longtown MRT attended and called for assistance from SMWCRT. A Team member was able to descend and reach the dog in order to rig for hauling. A successful outcome as the dog was brought to the surface. 5 members deployed, 4 on standby, duration 4 hours. Very good joint working relationship with LMRT.</p>
11/8/20	Dan Yr Ogof	<p>Overdue A gate failure at the entrance to DYO left 2 CSS cavers stuck on the inside of the gate. 19 members deployed, 1 on standby, duration 2 hours.</p>
24/10/20	Cwm Dwr 2	<p>Assist police as abandoned tents were near cave entrance A member of the public reported to the police that she had seen the gate to Cwm Dwr 2 open and nearby in the quarry were abandoned tents. Police asked SMWCRT to search the entrance with officers present as there were reports of sensitive data near to the tents. Nothing found. 1 member involved, 4 on standby, duration 1.1 hours.</p>

Over the last year SMWCRT have remained rescue ready, and have continued training to keep up to date with the challenges of COVID 19.

An access agreement is now in place with the North Wales Wildlife Trust for the caves at Minera. At the moment access is not possible because of Covid restrictions, but as restrictions begin to be relaxed, we'll be open for visitors again. Anyone requiring access should contact the club secretary in the first instance at secretary@northwalescavingclub.org.uk.

Item 1 – Response to minutes of 2020 Conservation and Access Report

We would like to respond to the item that was minute in the 2020 AGM minutes that stated that our club (club X) was pursuing a vendetta against another club. I would like to start off by stating that this is false for reasons that I will go into below.

Firstly, I need to correct you when you say the club attracted existing club members by recounting what actually happened and why the split occurred. A number of new people, all of whom had limited caving experience, regardless of what you may have been told, applied to join the club. They were accepted and proceeded to become active members of the club. Unfortunately, it became clear that one of this group was promoting unsafe and generally unacceptable practices with very large groups entering OCAF and crossing conservation tapes. A lot of these transgressions resulted in photographs being posted on social media and so came to the attention of the club's committee. A meeting of concerned parties was held and it was agreed that the new members required guidance rather than censure and a further meeting was arranged with the intention of asking the club chairman to intervene and offer this guidance. I am unaware if this ever happened but I suspect not. At a later date, the group's leader requested the use of the OCAF key but was refused by the key holder who had seen the social media posts. This resulted in many toys being thrown out of a pram, many unfounded accusations made against club members and all the new members leaving the club. A new club, Club Y, was set up and our chairman did indeed join this club but he remained a member and chairman of Club X until the AGM when it was felt by many that he had divided loyalties and after a new chairman was elected, he no longer participated in club activities or meetings.

I do know that the behaviour of some of Club Y's members was raised by some of the Club X members, but it was clear that nothing could or would be done and we, as a club, let things lie. As time went on, it was apparent to some of the **individual** club members, one of whom had personal experience with Club Y before joining Club X, that various dubious practices were still being undertaken and encouraged by the same character that had stomped off to form a new club previously and raised this with other parties. This was the source of the small number of complaints followed by the freedom of information request to determine if any action had been taken as it was not apparent that any had. There has been an element of 'winding up' but again, this has been undertaken by individuals and when it became known to the club committee, the individuals were asked to desist. The Christmas Day post was unfortunate, and I made this clear to the moderators that this was an individual's perspective not the club's. The Christmas Day post was in response to the fact that Club Y had experienced a split in a similar vein to the earlier split from Club X. I would not like to go into detail of what has been heard but it appears that our previous concerns had been justified and the individual in question has left the new club. Since then, as far as we are aware, there have been no further complaints raised or 'winding up' episodes.

So, I would reiterate that there is no vendetta being pursued by Club X and any complaints made were really in response to an individual's actions, not Club Y's. We would rather that

both clubs continued to exist and that a more friendly relationship can be created. One of our club members did in early 2020 reach out to Club Y to start the process of reconciliation and a meeting was planned. Unfortunately, the COVID pandemic interrupted these plans and no further interactions have been possible. Hopefully, we can restart the process in the near future.

There have been no further episodes of 'winding up' and as a club, we had hoped that this chapter in the club's story had been finished.

So, to conclude, I hope that this sets the record straight and we would like this to be recorded against the 2020 minutes to show both sides of the story.

Kind Regards,

'Club X' Committee.

Item 2

Letter from David Cooke BCA IT Working Group Convenor (2012 – 2020)

Mr Allan Richardson
The Secretary
Cambrian Caving Council
18th March 2021

Dear Allan,

Ahead of the 2021 Cambrian AGM I've just read through the 2020 AGM Draft Minutes. I found the following paragraph, about me, in section 7 BCA Matters by Stuart France which has caused me great distress on top of an episode that has already caused me a great deal of distress.

"The BCA AGM also voted for more use of the internet such as online ballots and for BCA officers to be allowed to communicate with BCA members by email. I am serious. This innovation has been blocked by one individual in a key BCA role who refused to provide the membership and email database to the BCA secretary. Council at its October 2019 meeting ordered him to hand it over and he then did not comply. The matter came back to the January 2020 Council meeting in which he was offered the choice of complying, resigning or being removed. As the first two options were refused, the result was his dismissal and by a clear majority. It is sad when someone who has put much time and effort into BCA has left because of an unwillingness in some quarters to accept a democratically chosen direction of travel."

I refute these allegations. Throughout this sorry episode BCA failed to provide any support to resolve the differences between The BCA Secretary, BCA Webmaster and I, BCA's IT Working Group Convenor at the time. Arbitration was proposed but rejected. Subsequently the BCA Executive did initiate a third party investigation, which I was in favour of but that was squashed by my detractors. This was bad for BCA then and is bad for BCA going

forward when it listens to those who shout the loudest rather than getting to the truth of the matter.

My response at the time to the BCA Secretary is Appendix 1 of the Jan 2020 Minutes, available from the BCA website <https://british-caving.org.uk/about-bca/bca-council/official-documents/> . I would encourage your members to read it since it is the only public document, to date, that puts my side of the argument.

The allegation that I blocked online ballots is ludicrous. I along with Bob Mehew ran BCA's first online ballot in 2017, votes were accepted by email. I then ran the second online ballot in 2019 with Gary Douthwaite's (the newly elected BCA Webmaster) help both of us developing the necessary software together, votes were placed using an online form. I'm totally in favour of online ballots. It is not unreasonable to say that I did more than any other single person to enable online voting for BCA. What I objected to was the proposal to disenfranchise the third of the membership who hadn't supplied email addresses by not posting them ballot papers.

The allegations that I blocked "BCA officers to be allowed to communicate with BCA members by email" or that I "refused to provide the membership and email database to the BCA Secretary" is totally false.

The BCA Secretary never asked me for a list of emails to communicate with the members. If he had I would have given him free access to the admin page within BCA Online that exported a list of members email addresses to a spreadsheet ready for use by mailing list software. These same routines were used by the Ballot Sending Officer to email out the voting ballots. In general there was no need for the Secretary to run mailshots himself since, being somewhat technical, I ran them but if he wanted to, he could have.

The master membership database is held by the Membership Administrator, the BCA Online database is a copy. For the full set of data the BCA Secretary could also have asked the Membership Administrator.

At the Oct 2019 BCA Council meeting the BCA Secretary was offered a copy of the BCA Online database, which he refused.

If you study the Minutes of the Jan 2020 BCA Council meeting where this matter came to a head you see there is no mention of me blocking the Secretary from running ballots or emailing the members as is falsely alleged in Stuart France's report.

What the BCA Secretary did ask for, on the BCA Webmaster's behalf was direct access to the BCA Online database for some unspecified software redevelopment. As BCA's IT Working Group Convenor it was my responsibility to look after the integrity of the database.

As every professional software developer knows you do not develop software against the live database, you develop it against a test copy. The risk of accidentally corrupting the live data is far too high. This was my first reason for denying write access to the database.

Secondly the BCA Webmaster, despite repeated requests, refused to say what changes he intended to make. I had serious doubts that the Webmaster sufficiently understood the

workings of the database to alter it without breaking the functionality of it. This was my second reason for denying write access to the database.

I had given the BCA Webmaster all the information and access that he needed to do his job. He had the password giving full access and control of the british-caving.org.uk website the same week as being elected. Before his election I had made him aware of the public BCA Online GitHub repository which contains all the source code, design notes and database schema.

In the BCA's Webmasters resignation statement (April 2020) he gave, for the first time, a bullet point description of his aims. This included "A new, user friendly members area (to replace what is now BCA Online)". He never intended to keep BCA Online and as such he never needed write access to it. So why cause the sacking of a BCA Officer over it?

Can you please ensure this letter is put before the Cambrian 2021 AGM and that it is written into the permanent record.

Yours sincerely

David Cooke BCA
IT Working Group Convenor (2012 – 2020)
